1. **Summary.** This document is intended to establish policy and procedures and to assign responsibilities for managing the dissemination of intelligence information within the USEUCOM area of responsibility (AOR).
 2. **Applicability.** This Directive applies to all HQ USEUCOM directorates/staff offices, components and associated units that perform intelligence dissemination functions.
 3. **Internal Control System.** This Directive contains no internal control provisions and is subject to the requirements of the internal management control program. For HQ USEUCOM and subordinate joint activities, the applicable internal control directive is ED 50-8, Internal Management Control Program.
 4. **Suggested Improvements.** The proponent of this Directive is the Production Branch, Production Requirements Division, Intelligence Directorate. Suggested improvements should be forwarded to HQ USEUCOM, ATTN: ECJ22-P, Unit 30400, Box 1000, APO AE 09128.

 6. **Background.** The objective of the intelligence dissemination process is to provide consumers with timely intelligence in a format suitable to accomplish the mission. The rapid expansion of electronic publishing as a method of supplying intelligence continues to impact dissemination doctrine radically. However, increasingly interrelated and overlapping interests tend to confuse organizational roles and responsibilities. Reference a articulates overall intelligence product dissemination procedures for the DoD. It establishes a requirement for a

Dissemination Program Manager (DPM) to direct the program at the Unified Command level. Reference b provides additional details on intelligence dissemination at the Theater level to include production center responsibilities and procedures for peace, crisis, and war. Reference c is superseded by this directive.
